

THERMAFIN

30-YEAR WARRANTY

HF WELDED JOINT
BECOMES ONE CONTINUOUS
PIECE OF COPPER

*Bob Russell,
THERMAFIN SOLAR Marketing
Manager, shown holding a
portion of a THERMAFIN fin tube.*

**Our welded joint
was made to last...
and last...and last.**

**That's how we can offer
the longest warranty
in the solar energy field.**

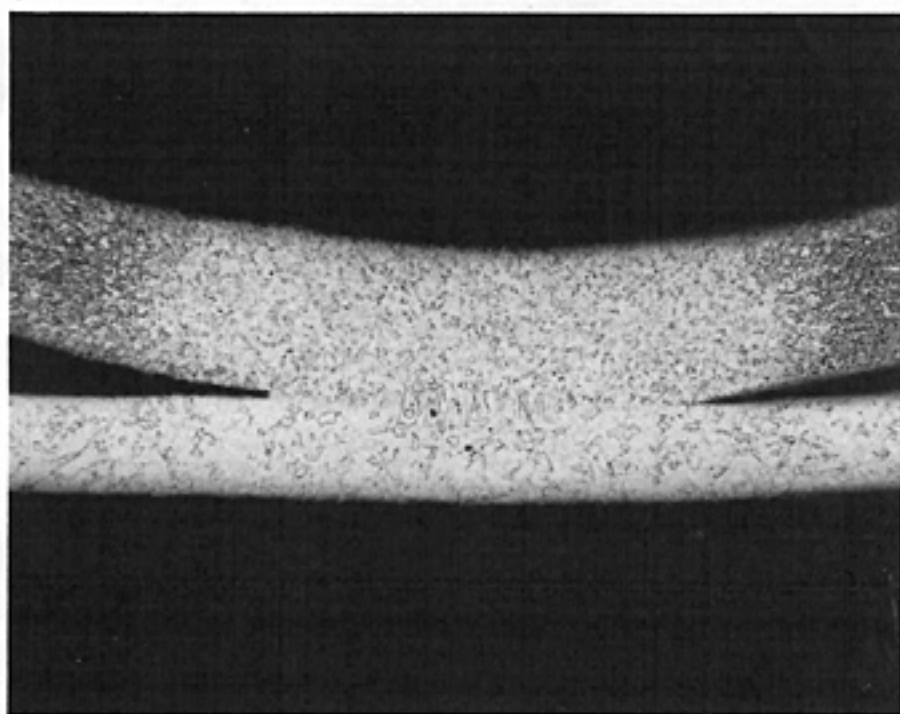

You might well ask how we at THERMAFIN SOLAR can so dramatically exceed the warranties of our competitors. The answer can be found in our highly dependable, high-frequency welded joint. That's the joint between the riser tube and the heat-conducting fin—that together make up the most durable, high-efficiency fin tube on the market today.

Our weld is warranted to maintain its structural and thermal integrity for 30 years (but not exceeding the life of the fin or tube). To find out more about the THERMAFIN fin tubes and absorber plates—write to Robert E. Russell, Marketing Manager, THERMAFIN SOLAR, Thermatool Corp., 280 Fairfield Ave., P.O. Box 522, Stamford, CT 06904-9990, or call (203) 357-1555.

THERMAFIN solar

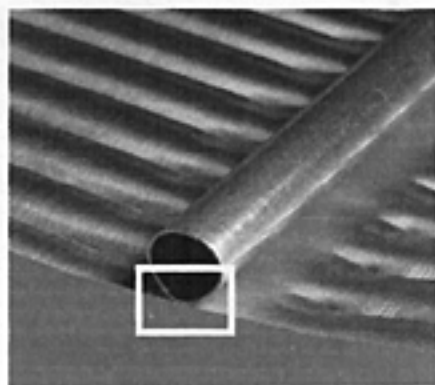

**Will the
solar system
you're
considering
still heat
your water
after 1 year?
...5 years?
...30 years?**

Photograph above of THERMAFIN fin-tube cross section (magnified 46 times) shows how the high frequency forge-welding process provides complete and permanent bonding of fin to tube, as evidenced by the grain growth across the joint.

Photograph at right shows end portion of actual THERMAFIN fin-tube. Superimposed rectangle shows area of magnified photo above.

**Protect your
investment;
insist on THERMAFIN.**

Efficient solar water heating starts with high thermal conductivity between fin and tube inside the solar collector. For lasting performance and durability, this fin-to-tube joint must be highly conductive and strong enough to endure the unremitting torture of the sun's rays—which can cause other types of joints to weaken and pull apart. The high frequency weld of the THERMAFIN

joint insures high efficiency and unsurpassed strength. There are *no solder or crimped-seam joints* to weaken or fail. THERMAFIN performs with the highest efficiency year after year.

Only THERMAFIN comes with a **30 YEAR WARRANTY***—a warranty that is based upon proven durability.
